Teacher Education and Special Education
1992, Volume 15, No. 4, 317–325

A Cumulative Author Index of *Teacher Education and Special Education*: 1978, *1*(1) through 1984, 7(4)

George J. Haus

This cumulative author index was developed as a service for the readers of *Teacher Education and Special Education*. It was prepared as a resource for scholars wishing to access the 241 articles published in the first 7 volumes of this journal.

Since many literature searches involve tracking authors across a program of studies and individual authors may not always be "first" authors, this index contains authors cross-referenced to each citation. In total, 451 author citations are included.

I hope that this bibliographic index will be of help to readers who wish to access trends, issues, and research on the education and training of teachers of individuals with disabilities.
